

CONTENTS

I. Course Lecturers

Jean-Marc DELORT — Long time existence results for Hamiltonian non-linear Klein-Gordon equations on some compact manifolds	1
Charles M. ELLIOTT, Luke HATCHER and Philip J. HERBERT — Small deformations of spherical biomembranes	39
Tim LAUX and Felix OTTO — The thresholding scheme for mean curvature flow and de Giorgi's ideas for minimizing movements	63

II. Invited Lecturers

Sanjeeva BALASURIYA — Stochastic approaches to Lagrangian coherent structures	95
Akito FUTAKI and Hajime ONO — Geometric nonlinear problems and GIT stability through moment maps	105
Elliott GINDER and Ayumu KATAYAMA — On the inclusion of damping terms in the hyperbolic MBO algorithm	115
Bronwyn H. BRADSHAW-HAJEK and Philip BROADBRIDGE — An analytic solution for a Gompertz-like reaction-diffusion model for tumour growth	127
Peter van HEIJSTER and Takashi TERAMOTO — Pinned pulse solutions in a FitzHugh–Nagumo model with a bump-type heterogeneity	137
Shouhei HONDA — Rigidity for positive Ricci curvature via metric measure geometry	151
Masahiro IKEDA — Blow-up of solutions to semilinear wave equations with a scaling invariant critical damping	163
Takahisa INUI — Asymptotic behavior of the energy critical nonlinear wave equation with a special scale invariant damping	171
Katsuyuki ISHII — Convergence of a threshold-type algorithm for curvature-dependent motions of hypersurfaces	181
Kenichi ITO and Erik SKIBSTED — Spectral theory on manifolds	193

Toru KAJIGAYA and Keita KUNIKAWA — A convergence of generalized Lagrangian mean curvature flow in Kähler manifold with positive weighted Ricci form	205
Soichiro KATAYAMA — Global existence and the asymptotic behavior for systems of nonlinear wave equations violating the null condition	215
Takashi KAGAYA and Yoshihito KOHSAKA — A note on traveling waves for area-preserving geometric flows	227
Miyuki KOISO — Uniqueness problem for closed non-smooth hypersurfaces with constant anisotropic mean curvature	239
Joachim KRIEGER — Stability properties of blow up solutions for critical Wave Maps	259
Ning-An LAI — Weighted $L^2 - L^2$ estimate for wave equation in \mathbf{R}^3 and its applications	269
Qing LIU — On an obstacle problem arising in large exponent asymptotics for one dimensional fully nonlinear diffusions of power type	281
Tatsu-Hiko MIURA — Singular limit problem for the Navier–Stokes equations in a curved thin domain	291
Hayato MIYAZAKI — Lower bound for the lifespan of solutions to the generalized KdV equation with low-degree of nonlinearity	303
Makoto NAKAMURA — On some effects of background metrics for several partial differential equations	315
Matteo NOVAGA and Alessandra PLUDA — Elastic networks, statics and dynamics	325
Mamoru OKAMOTO — Random data Cauchy problem for the quadratic nonlinear Schrödinger equation without gauge invariance	337
Koya SAKAKIBARA — Numerical analysis of constrained total variation flows	349
Tetsuya ISHIWATA and Takiko SASAKI — The blow-up curve of solutions for semilinear wave equations with Dirichlet boundary conditions in one space dimension	359
Jacob STERBENZ — Local energy decay and the vector field method	369

Yuusuke SUGIYAMA — Remark on global existence of solutions to the 1D compressible Euler equation with time-dependent damping	379
Ning-An LAI, Nico Michele SCHIAVONE and Hiroyuki TAKAMURA — Short time blow-up by negative mass term for semilinear wave equations with small data and scattering damping	391
Tsuyoshi HOURI, Norihiro TANAHASHI and Yukinori YASUI — Separability of Maxwell equation in rotating black hole spacetime and its geometric aspects	407
Masaharu TANIGUCHI — Traveling fronts in balanced bistable reaction-diffusion equations	417
Yoshihiro TONEGAWA — An existence theorem for Brakke flow	429
Lindsay MARTIN, Jay CHU and Richard TSAI — Equivalent extensions of partial differential equations on surfaces	441
Mu-Tao WANG — Quasi-local mass and isometric embedding with reference to a static spacetime	453
Wei-Min WANG — Quasi-periodic solutions to nonlinear PDEs	463
Kelei WANG — Simons cone and saddle solutions of the Allen-Cahn equation	471
Gilbert WEINSTEIN — Harmonic maps with prescribed singularities and applications in general relativity	479
Neshan WICKRAMASEKERA — Regularity of minimal and CMC stable hypersurfaces: a brief overview	491
Karen YAGDJIAN — A novel integral transform approach to solving hyperbolic equations in the curved space-times	513
Sumio YAMADA — Harmonic maps and the Einstein equation	525
Haoyang CHEN and Yi ZHOU — Global regularity for Einstein-Klein Gordon system with $U(1) \times \mathbb{R}$ isometry group	533
