

## CONTENTS

### I. $C^*$ -algebras

Bruce Blackadar — Semiprojectivity in simple $C^*$ -algebras	1
Nathanial P. Brown — On quasidiagonal $C^*$ -algebras	19
Nathanial P. Brown and Marius Dadarlat — Extensions of quasidiagonal $C^*$ -algebras and $K$ -theory	65
Jeong Hee Hong — The ideal structure of graph algebras	85
Ja A Jeong — Stable rank and real rank of graph $C^*$ -algebras	97
Qing Lin and N. Christopher Phillips — Direct limit decomposition for $C^*$ -algebras of minimal diffeomorphisms	107
Masaru Nagisa — Single generation and rank of $C^*$ -algebras	135
Hideki Nakamura — Aperiodic automorphisms of certain simple $C^*$ -algebras	145
Chun-Gil Park — $C^*$ -algebras over spheres with fibres noncommutative tori	159
Mikael Rørdam — Stable $C^*$ -algebras	177

### II. von Neumann algebras

Masaki Izumi — Non-commutative Markov operators arising from subfactors	201
Yasuyuki Kawahigashi — Braiding and nets of factors on the circle	219
Nobuya Sato — A notion of Morita equivalence between subfactors	229
Yoshimichi Ueda — Amalgamated free product over Cartan subalgebra, II Supplementary results & examples	239

### III. Miscellaneous topics

Trond Digernes — Finite approximations and physics over unconventional fields	267
Fumio Hiai and Hideki Kosaki — Operator means and their norms	271

Taku Matsui — Quantum spin chain and Popescu systems	285
Kengo Matsumoto — Topological conjugacy invariants of symbolic dynamics arising from $C^*$ -algebra K-theory	299
Yasuo Watatani — Relative positions of four subspaces in a Hilbert space and subfactors	319
