CONTENTS

Part I

— Photos of Kiyoshi Oka 2

— Oka, Kiyoshi 3

— Memorial Conference of Kiyoshi Oka's Centennial Birthday on Complex Analysis in Several Variables, Kyoto/Nara 2001 6

— Message from Professor Henri Cartan 14

Part II

Toshio Nishino — Mathematics of Professor Oka – a landscape in his mind – 17

Yoshihiro Aihara — Uniqueness problem for meromorphic mappings under conditions on the preimages of divisors 31

Takao Akahori — On the middle dimension cohomology of A_l singularity 37

Takashi Aoki, Takahiro Kawai and Yoshitsugu Takei — The exact steepest descent method — a new steepest descent method based on the exact WKB analysis 45

Eric Bedford — Excursions of a complex analyst into the realm of dynamical systems 63

Jawher El Goul — Demailly's 2-jet negativity of certain hyperbolic fibrations 85

John Erik Fornæss — Short C^k 95

Hirotaka Fujimoto — Some constructions of hyperbolic hypersurfaces in $P^n(C)$ 109

Kengo Hirachi — A link between the asymptotic expansions of the Bergman kernel and the Szegö kernel 115

Andrei Iordan — On the non-existence of smooth Levi-flat hypersurfaces in CP_n 123

Su-Jen Kan — Recent development on Grauert domains 127

Kang-Tae Kim — Analytic polyhedra with non-compact automorphism group 135

Shoshichi Kobayashi — Problems related to hyperbolicity of almost complex structures 141

Joseph J. Kohn — Ideals of multipliers 147

Gen Komatsu — The Bergman kernel of Hartogs domains and transformation laws for Sobolev-Bergman kernels 159

Masatake Kuranishi — An approach to the Cartan geometry II : CR manifolds 165

László Lempert — The $\bar{\partial}$ equation in N variables, as N varies 189

Kazuko Matsumoto — Levi form of logarithmic distance to complex submanifolds and its application to developability 203

Yoichi Miyaoka — Numerical characterisations of hyperquadrics 209

Seiki Mori — Meromorphic mappings and deficiencies 237

Junjiro Noguchi — Intersection multiplicities of holomorphic and algebraic curves with divisors 243

Takeo Ohsawa — Generalization of a precise L^2 division theorem 249

Mikael Passare — Amoebas, convexity and the volume of integer polytopes 263

R. Michael Range — On the decomposition of holomorphic functions by integrals and the local CR extension theorem 269

Oswald Riemenschneider — The monodromy covering of the versal deformation of cyclic quotient surface singularities 275

Georg Schumacher — Moduli as algebraic spaces 283

Satoru Shimizu — Prolongation of holomorphic vector fields on a tube domain and its applications 289

Manabu Shirosaki — Hypersurfaces and uniqueness of holomorphic mappings 301

Shigeharu Takayama — Seshadri constants and a criterion for bigness of pseudo-effective line bundles 307

Hajime Tsuji — Subadjunction theorem 313

Tetsuo Ueda — Fixed points of polynomial automorphisms of $\mathbf{C}^n$ 319

Katsutoshi Yamanoi — On Nevanlinna theory for holomorphic curves in Abelian varieties 325

Stephen S.-T. Yau — Numerical characterization for affine varieties be a cone over nonsingular projective varieties 333

Ken-Ichi Yoshikawa — Nikulin's $K3$ surfaces, adiabatic limit of equivariant analytic torsion, and the Borcherds Φ-function 339
