CONTENTS

Memories

John Coates — Memories of Kenkichi Iwasawa i

Ehud de Shalit — My recollections of Kenkichi Iwasawa ix

Ralph Greenberg — My memories of Iwasawa xiii

Masato Kurihara — Memories of Professor Iwasawa xvii

Survey Articles

David Loeffler and Sarah Livia Zerbes — Euler systems with local conditions 1

Andreas Nickel with an appendix by Henri Johnston and Andreas Nickel — Notes on noncommutative Fitting invariants 27

Xin Wan — Iwasawa theory for modular forms 61

Research Articles

Werner Bley and Martin Hofer — Construction of elliptic $\mathfrak{p}$-units 79

David Burns, Masato Kurihara and Takamichi Sano — On Stark elements of arbitrary weight and their p-adic families 113

Kâzım Büyükboduk — Beilinson–Kato and Beilinson–Flach elements, Coleman–Rubin–Stark classes, Heegner points and a Conjecture of Perrin-Riou 141

Shih-Yu Chen and Ming-Lun Hsieh — On primitive p-adic Rankin-Selberg L-functions 195

Samit Dasgupta and Mahesh Kakde — On the rank one Gross–Stark conjecture for quadratic extensions and the Deligne–Ribet q-expansion principle 243

Ralph Greenberg and Vinayak Vatsal — Iwasawa theory for Artin representations I 255

Cornelius Greither — Iwasawa-Cohen-Lenstra heuristics 303

Cornelius Greither, Masato Kurihara and Hibiki Tokio — The second syzygy of the trivial G-module, and an equivariant main conjecture 317

Haruzo Hida — Cyclicity of adjoint Selmer groups and fundamental units 351

Takenori Kataoka — Fitting invariants in equivariant Iwasawa theory 413

Kazuya Kato — Height functions for motives, II 467

Shinichi Kobayashi and Kazuto Ota — Anticyclotomic main conjecture for modular forms and integral Perrin-Riou twists 537

David Loeffler, Christopher Skinner and Sarah Livia Zerbes — Syntomic regulators of Asai–Flach classes 595

Yasushi Mizusawa and Gen Yamamoto — Iwasawa invariants and linking numbers of primes 639

Oliver Thomas and Otmar Venjakob — On spectral sequences for Iwasawa adjoints à la Jannsen for families 655
